

FuelMaker's Home Refueling Appliance, Phill, is Now Available for World Wide Distribution

Phill, the world's first home refueling appliance for Natural Gas Vehicles, is based on FuelMaker's Vehicle Refueling Appliance (VRA) technology. Since 1989, FuelMaker has supplied over 10,000 VRAs with great success, building a reputation for reliability and customer satisfaction. Phill was launched in the USA and France in 2005, and is ready for world wide distribution. Consumers can now fill up at home with a true Home Refueling Appliance!

Phill is Easy to Install:

- Phill is very compact and can be installed on a wall or post, indoors or outdoors. All that is needed is an existing natural gas and electrical supply.

Phill is Easy to Use:

- Simply plug Phill into your NGV, press "start" and let Phill fill your tank. Phill will easily refuel a typical commuter vehicle overnight, and will shut off automatically when the tank is full.

Phill Features:

- Full self diagnostic electronics
- Integrated gas dryer
- Integrated gas detector
- Integrated ventilation
- Oil-free compression module (no fuel contamination)
- No annual maintenance required
- Carries CSA International and Certgaz certifications, as well as CE markings

Interested in Becoming a Phill Dealer?

Interested companies believing that they can market, sell, and service FuelMaker's Home Refueling Appliance, Phill, in their country are invited to contact FuelMaker for more information and dealer requirements.
