

For Immediate Release:

FuelMaker Receives Three Awards in California

TORONTO, Ontario October 25th, 2005 — The **South Coast Air Quality Management District** (SCAQMD) in California, USA has honored FuelMaker Corporation by awarding their prestigious **Clean Air Award** for the **Advancement of Air Pollution Technology**.

The Clean Air Awards honor those who have made a significant contribution to cleaner air through innovation, leadership and personal environmental commitment. More specifically this award is for an extraordinary contribution to the development and application of new technology designed to reduce emissions. SCAQMD particularly honored FuelMaker for their unique contribution to the advancement of natural gas refueling technology with the introduction of Phill, the company's home refueling appliance. Also mentioned was FuelMaker's leading role in research towards the fuel cell vehicle market, most notably their hydrogen compressor for the new hydrogen refueling station at the Honda facility in Torrance.

This award was complimented by a **Certificate of Recognition** from the **California State Assembly**. They praised FuelMaker's leadership and dedication to protecting the environment and promoting clean air in Southern California.

FuelMaker was further honored by a **Certificate of Congratulations** from the **City of Los Angeles** for the company's advancement of air pollution reduction technology. The City commended FuelMaker for their continuing dedication to improving the quality of life for the residents of Los Angeles.

John Lyon, President and CEO of FuelMaker, commented that "FuelMaker has been pursuing a vision for the last 13 years of providing an economic and environmentally friendly fuel that contributes to clean air goals. The recognition received today is much appreciated by the company and its dedicated employees".

The ceremony took place on Thursday, October 20, 2005 at the Los Angeles Convention Center. The awards were accepted on behalf of FuelMaker by Gunter Stefan, FuelMaker's Executive Vice President of Operations.

###

The South Coast Air Quality Management District's mission is to achieve healthful air quality for the 16 million people living in its region. The AQMD monitors air quality, issues permits to, and inspects more than 25,000 businesses operating in the South Coast air basin. The agency also works within the community to educate people on air pollution, how it affects their health, and what they can do to help improve air quality.

FuelMaker Corporation, based in Toronto, Canada, has been a pioneer and leader in the alternative fuel technology industry. The company has been designing, manufacturing, servicing, and providing their vehicle refueling appliances throughout the world for over 15 years. In 2005 FuelMaker unveiled their home based refueling appliance called "Phill" that allows home owners to refuel their Natural Gas Vehicles from the comfort and security of their own home, from their existing gas supply.

For more information on Phill and FuelMaker, please visit www.myphill.com or call Jeff Harju at 1-866-697-4455. Inquiries may also be sent to jharju@fuelmaker.com.
